

Three ways we support you across the lifecycle of Fit-Out projects.

Differentiating your bid, securing a competitive advantage and increasing the scope and profitability of your projects

1 Pre-win

(Planning / Initial Design)

- We meet with your team and potential client as YOUR occupant wellness, safety and protection experts
- We introduce enhanced occupant safety and wellness options tailored to space, vision, building, BMS
- We look for ways to differentiate your planning / bid and add-value
- We look to increase the sales opportunity and delight the client

2 Design Development

(Enhanced occupant safety and wellness)

- Enterprise solutions for Access Control, Contactless Doors and Elevators, Occupancy Management, monitoring of Social Distancing, Occupant Health Screening, Air Purification....can all influence waypoint planning and 'quiet' enjoyment of workspace
- Spatial differentiation
- Enhanced security, safety and integrated wellness systems support space utilisation, occupant productivity, and reinforce your client's company culture

3 Installation & Warranty

(Project delivery, hand-over, post-project 12-month service)

- Dedicated PM from appointment to hand-over
- Rapid mobilisation
- On-time, to-budget, to-plan
- 12-month warranty backed by guaranteed on-site maintenance visits, training & SLA
- Client more likely to meet your bid price for discernible quality and value-add on 'Agile' and 'Enhanced' Fit-Out projects

What does your next Fit-Out look like?

Every fit-out project has a fire protection, life safety and security element. However not every fit-out needs a 'Traditional' specification approach. Some are better suited to 'Agile' or 'Enhanced' occupant safety and wellbeing which positively impact building operation design and can be a large differentiator to your approach and solution pre-construction.

Ace have a 4-step process ('Consult', 'Design', 'Install' and 'Enhanced Safety & Wellbeing') which is suited to most fit-outs.

Talk to Ace Fit-Out experts [Dan Bradding](#), [Mark Goldsmith](#) or [Richard Albone](#) about how enhanced safety and wellbeing can be brought in to your next specification or project and delight the building occupants.
